

Saurav Kashyap

Salesforce Developer and Administrator | SFDC Configuration and Customization | Apex and Visualforce

Bangalore, India | +91 7991194228 | urskashyap21@gmail.com | [linkedin.com/in/saurav21](https://www.linkedin.com/in/saurav21) | github.com/sau181v

Professional Summary

Salesforce Certified Developer and Administrator with ~5 years of SFDC experience across configuration, customization, and administration. Hands-on with Apex and Visualforce development, triggers, validation rules, workflow rules, assignment rules, and tasks, plus in-depth work on the SFDC security model of profiles, roles, and sharing rules. Configures and customizes functional areas of Sales Cloud including lead management, case management and customer service, and report and dashboard development. Experienced across the full application life cycle from analysis and technical design through development, deployment, and ongoing production support.

Technical Skills

SFDC Administration and Setup: Salesforce.com Setup, User and License Management, Profiles, Roles and Role Hierarchy, Permission Sets, Sharing Rules, Organization-Wide Defaults, Field-Level Security, Record Types, Page Layouts, Object and Field Configuration

Configuration and Automation: Validation Rules, Workflow Rules, Assignment Rules, Escalation Rules, Approval Processes, Tasks and Activity Management, Flows, Process Automation, Queues, Email Templates and Alerts

Development: Apex Classes, Apex Triggers, Visualforce Pages and Controllers, Lightning Web Components (LWC), Aura, Asynchronous and Batch Apex, Apex Test Classes, SOQL, SOSL, JavaScript, Java, HTML, CSS

Sales Cloud and Service Cloud: Lead Management and Conversion, Opportunity and Sales Process Configuration, Customer Service and Case Management, Reports and Dashboard Development, Service Cloud, Experience Cloud, CPQ Cloud, Manufacturing Cloud

Data and Integration: Salesforce Data Loader, Data Import and Export, Data Migration and Reconciliation, Web Services API (REST and SOAP), Composite and Bulk API, Platform Events, JSON, Postman, Workbench, Salesforce Inspector

Deployment: Change Sets, Apache Ant Migration Tool, Git, Salesforce DX and CLI, 1GP/2GP Packaging, CircleCI, VS Code, Sandbox Management and Refreshes

Practices: Full Application Life Cycle, Requirement Analysis and Technical Design, Production Support and Issue Triage, Agile and Scrum, UAT Support and End-User Training, Technical Documentation, Team Leadership and Mentoring, Strong Written and Verbal Communication

Professional Experience

Sitracker

Bangalore, India

Software Engineer, Salesforce Development and Administration

September 2025 - Present

- Analyse, design, and implement solutions on the SFDC platform across the full application life cycle, from technical design through development, testing, and release.
- Deliver ongoing project-based development and enhancements each quarter using Apex, Visualforce, and Lightning Web Components.
- Provide SFDC production support across client instances: triage and resolve defects, monitor data integrity, and support users through release and quarter-end cycles.
- Administer org configuration including profiles, permission sets, sharing settings, page layouts, and record types, and manage sandbox refreshes and deployments via Change Sets, Ant, and Git pipelines.
- Build reusable components and maintain technical documentation and onboarding material for client and internal teams across EMEA, APAC, and NAM.

Appstrail Technology Pvt. Ltd.

Bangalore, India

Salesforce Developer / Administrator

March 2022 - September 2025

Employee of the Quarter (Q4 FY24); Customer Success Award (FY23)

- Configured and customized functional areas of Sales Cloud, covering lead management and conversion, sales process configuration, case management and customer service, and report and dashboard development.
- Implemented the SFDC security model for multi-team orgs: profiles, roles and role hierarchy, permission sets, organization-wide defaults, and sharing rules, with field-level security on sensitive client data.
- Built declarative automation with validation rules, workflow rules, assignment rules, approval processes, and tasks to enforce data quality and route work to the right owners.
- Developed Apex classes, Apex triggers, Visualforce pages, and custom Lightning Web Components to deliver requirements beyond declarative configuration.
- Integrated Salesforce with external payment and ERP systems using the web services API over REST and SOAP, exchanging JSON payloads.
- Migrated and reconciled client data using Data Loader and Workbench with validation and duplicate checks, and managed deployments across sandbox and production environments.
- Gathered requirements, produced technical designs, and ran UAT and end-user training for **Cashfree Payments**, **Bike Bazaar**, **Sunshield Chemicals**, and **Shaktiman Agro**; increased sales process efficiency by 20% through automation.

Certifications

Salesforce Certified: Administrator | Platform Developer I | Platform App Builder | JavaScript Developer I (Platform Developer I and App Builder supersede the retired Dev 401 credential)

Education

B.Tech., Information Science and Engineering | NCET, Bangalore, India

2018 - 2022
